

GLOBAL SPIDAR SERVICES

COMPLETE SPIDAR SOLUTIONS

NRG Systems offers turnkey Spidar installations and rentals in North America and has developed a global network of Value Added Resellers (VARs) to provide Spidar-specific services and support globally, at all stages of your campaign.

Field services, provided by NRG in North America and by Spidar VARs elsewhere in the world:

- IEC-compliant Calibrations
- Installation
- Relocation
- Maintenance
- Commissioning/Decommissioning

Remote services, provided globally by NRG Systems:

- System Monitoring
- Data Delivery

NRGSystems™

Inspection and Update Service

System assessment and updates to current Spidar version.

Validation Services

Performance validation against NRG reference Spidar or IEC-compliant met mast.

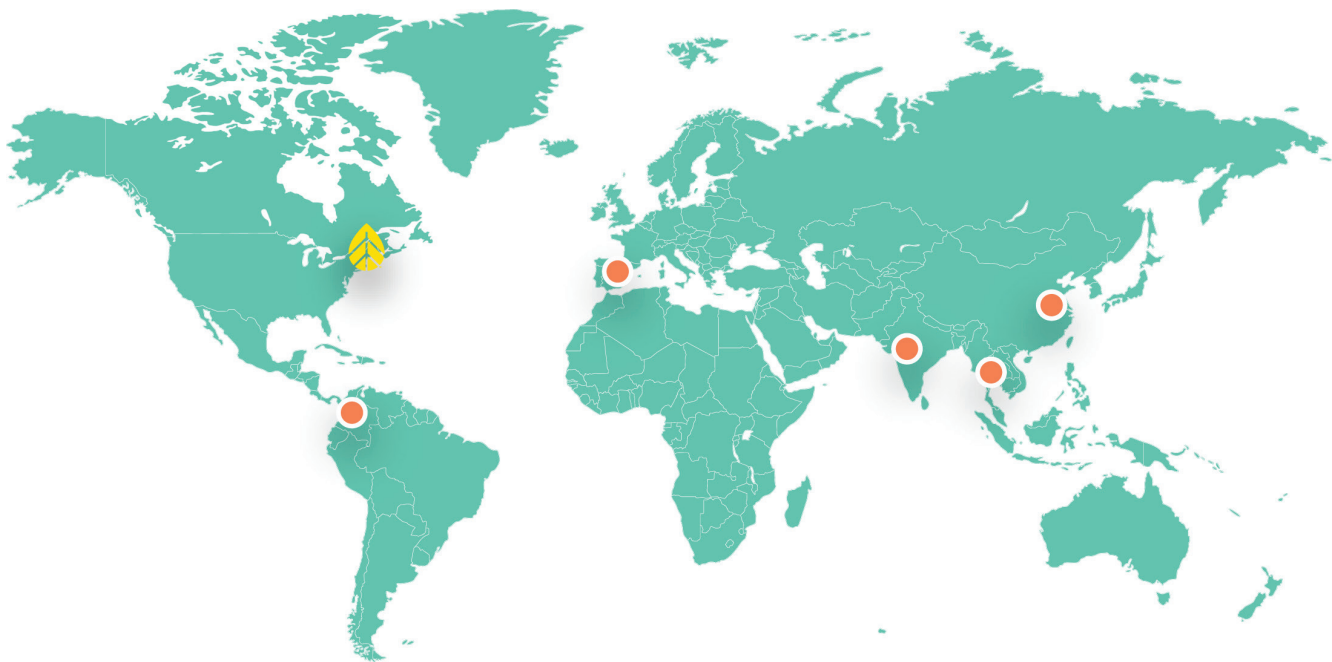

Monitoring Service

Daily review of Spidar system status and communication of any issues within one day.

Quick Start Service

On-site Spidar training and commissioning.

VAR NETWORK:

NRG Systems offers direct, in-field support in North America, while VARs provide services in the regions noted in the accompanying map. NRG also offers a range of data services globally.
