To Whom It May Concern

This is to certify that 'RK wind mast' has supplied us with 10 nos. of 90 meter lattice met towers along with complete instrumentation in the last six months. They have also undertaken the entire civil and erection works for all the masts. The supplier has completed all the work within a reasonable timeline and the quality of the work has been up to the mark. Our experience with 'RK wind' has been satisfactory and we have not faced any sort of issues related either with work or conduct of the vendor.

On behalf of Mytrah Energy (India) Ltd
